

SOFT SKILLS

Technical training & mentorship
Stakeholder communication
Process optimization
Requirements gathering
Conflict resolution
Cross-department collaboration
Strategic decision-making
Critical thinking
Adaptability in high-pressure situations

STRENGTHS

Proactive problem identification
Systems thinking
Continuous learning & research
Client relationship management
Attention to detail

TECHNICAL SKILLS

AI & Agentic Systems
Multi-agent orchestration

JACQUES VAN HEERDEN

SENIOR AI ENGINEER

Date of Birth: 27 October 1997
Languages: English, Afrikaans
Nationality: South African
Phone: (+27) 83 652 9714
Email: jvanheerden38@gmail.com
Driver's License: Code B & Own Transport
Passport: Yes

SUMMARY

Senior AI Engineer with hands-on experience designing and deploying multi-agentic AI solutions in enterprise environments. Currently building deterministic credit assessment agents for banking at scale, leveraging Python, OpenAI LLMs, vector databases, and orchestration frameworks. Background in AI-ready architecture, data integration, Microsoft cloud ecosystems, and C#/.NET & Python development.

EXPERIENCE

Senior AI Engineer | Mint Group | 2026/04/07 – Present

Job description:

- Advise, design, and implement AI-driven solutions for enterprise systems
- Deploy AI via Microsoft Copilot Studio & Azure AI Foundry
- Integrate AI solutions into Dynamics 365 environments
- Assess data sources for AI readiness including APIs
- Evaluate cross-platform AI offerings beyond Microsoft’s ecosystem

Key Project: FNB Commercial Credit Review Agent

- Multi-agentic solution for R100M–R600M commercial credit requests
- Deterministic math calculations; Python agent on OpenShift
- OpenAI LLMs; PostgreSQL + Langfuse for state; Weaviate for vector search
- Orchestration agent + Report sub-agent (NLP risk explanation)
- Generates Word template output, saves to SharePoint

Systems Engineer | Scaled | 2023/07/05 – 2026/04/03

Job description:

AI solution architecture
LLM integration (OpenAI)
Vector databases (Weaviate)
Deterministic AI pipelines
Data integration & API
orchestration
Generative AI for business
automation
Langfuse (observability)
Prompt engineering

MICROSOFT ECOSYSTEM

Azure AI Foundry
Copilot Studio (Lite & Full)
Dynamics 365
Azure AD / Entra ID
Microsoft 365 & SharePoint
Power Platform
Intune

DEVELOPMENT

Python (Senior)
C# / .NET (Senior)
REST API development
PowerShell automation
GitHub / YAML

DATABASES & DEVOPS

PostgreSQL / MySQL
MongoDB / Weaviate
Docker / OpenShift
CI/CD concepts

- Integrated automation with Microsoft 365 and Azure using scripts and APIs
- Developed automation scripts to enhance helpdesk operations
- Prepared system/ticketing/KB data for automation and AI readiness
- Designed secure, scalable architectures for future AI integrations

Key achievements:

- TSI Automation Project — AI-driven routing and automation
- Led operational continuity during dispatch management absence
- Team Player Award — communication and collaboration excellence

IT Supervisor | Prime Meridian Direct | 2021/06/22 – 2023/07/01

Job description:

- Supervised IT operations for 200+ end-users and managed technician team
- Led security hardening projects aligned with CIS Controls (v8)
- Coordinated system migrations and vendor relationships
- IT Performer of the Year Award.

Owner / Lead Technical Support | Backend IT (Pty) Ltd | 2019/08 – 2021/06

Senior IT Administrator | IT Tech Services | 2019/07 – 2020/10

Junior IT Manager | Laerskool Kenmare | 2018/11 – 2019/03

Service Desk Engineer | Vodacom Midrand | 2018

EDUCATION

- B.Sc. Information Technology (Cum Laude) — North-West University (Class of 2026)
- Golden Key Membership – North-West University (2024)
- Matriculated - Hoërskool Noordheuwel (Class of 2015)

QUALIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- Microsoft Certified: Azure Fundamentals
- ITIL v4 Foundations
- CCNA: Routing and Switching
- Fortinet: NSE 1 & 2
- CompTIA: A+
- MCSE: Cloud Platform & Infrastructure
- MCSE: Productivity
- MCSA: Windows Server 2012
